SUMMARY

BSc (Hons) Computing graduate with academic and project-based hands-on experience in Software Development, Artificial Intelligence, Machine Learning, and Cybersecurity. Completed an intensive software development programme at mthree, gaining practical experience in Java, Spring Boot, REST APIs, React, and Agile development through a collaborative FinTech Fraud Detection Platform project. Developed an end-to-end AI-powered Intrusion Detection System using Python, Machine Learning models, SHAP explainability, and Streamlit for cybersecurity risk prediction. Skilled in Java, Python, SQL, object-oriented programming, and problem-solving. Seeking a Graduate or Junior Software Developer, AI Engineer, or Machine Learning Engineer role to contribute to innovative technology solutions.

SKILLS

Programming Languages

- Java
- Python
- PHP
- SQL

Software & Web Development

- Spring Boot / Spring Framework
- React
- REST APIs
- HTML5 / CSS3

EXPERIENCE

Software Development Alumni Programme mthree - London, UK
09/2026 - 10/2026

- Completed intensive software development training covering Java, Spring Boot, REST APIs, SQL, Object-Oriented Programming and financial services technology.
- Collaborated in an Agile development team to build a full-stack FinTech Fraud Detection Platform.
- Led frontend development using React, transforming Figma designs into responsive and interactive user interfaces.
- Developed fraud investigation dashboards, case creation workflows, transaction selection and case management interfaces, integrating React components with backend REST APIs.
- Applied Git and GitHub for version control, collaborative development, testing, debugging and final project presentation.

Business Support Officer NIGHTHAWK INTERTEH LTD
05/2018 - 07/2023

- Identified new business opportunities within the fibre optic and telecommunications sector.
- Communicated with clients and subcontractors regarding installation enquiries.
- Managed email correspondence and telephone communications.
- Processed invoices and maintained business records.
- Supported day-to-day administrative and operational activities.

ACADEMIC PROJECTS

AI-Powered Intrusion Detection System (Dissertation)
Technologies: Python, Scikit-learn, TensorFlow/Keras, Streamlit, SHAP

- Designed and developed an AI-powered Machine Learning Intrusion Detection System for behavioural cybersecurity risk prediction.
- Implemented, trained, and evaluated Random Forest, Logistic Regression, Isolation Forest, and 1D-CNN Machine Learning models using the CICIDS2017 dataset.
- Developed an interactive Streamlit dashboard with SHAP explainability, model switching, attack logging, and real-time risk visualisation.
- Evaluated model performance using Accuracy, Precision, Recall, F1-score, and ROC-AUC to identify the most suitable deployment model.

Smart Study Assistant
Technologies: React, Material UI, Python, KeyBERT, MySQL

- Designing and developing a full-stack AI-powered educational web application for personalised study plans and learning resources.
- Integrated Natural Language Processing (NLP) using KeyBERT to generate topic-based learning recommendations.
- Developing a responsive React frontend with Python backend integration and MySQL database support.

AI-Based Climate Change Monitoring using Remote Sensing
Technologies: Python, TensorFlow, LSTM, XGBoost

- Developed an Artificial Intelligence solution using NASA Earth observation

- Object-Oriented Programming (OOP)
- Dependency Injection (DI)
- MVC Architecture

AI & Machine Learning

- Machine Learning
- Scikit-learn
- TensorFlow / Keras
- Streamlit
- SHAP

Databases

- MySQL
- Supabase (PostgreSQL)

Development Tools & Practices

- Git / GitHub
- Maven
- Postman
- IntelliJ IDEA
- Visual Studio Code
- Figma
- Agile / Scrum

LANGUAGES

Romanian, Russian: First Language

English: B2

Upper Intermediate

datasets to monitor climate-related environmental changes.

- Applied LSTM neural networks and XGBoost models to analyse vegetation, land surface temperature, and water storage.
- Processed and analysed large-scale satellite datasets to support environmental monitoring and prediction.

EDUCATION

BSc (Hons): Computing
Elizabeth School of London (Awarded by NCG) - Leicester, 07/2026

Bachelor of Science: Psychology
Pedagogical University - Chisinau, Moldova, 01/2016
